Mohamed Omar Farook

Senior Software Engineer

Senior Software Engineer with 10+ years of experience building scalable frontend platforms across banking, energy, and e-commerce. Strong focus on frontend architecture, reusable UI systems, test automation, and maintainable delivery.

Singapore omar@omarfarook.com +65 96567792 linkedin.com/in/mohamed-omar-farook

SELECTED IMPACT

- 10+ years building enterprise applications across banking, energy, and e-commerce.
- Frontend architecture across React, Next.js, TypeScript, GraphQL, Angular, and micro-frontend platforms.
- Reusable UI foundations for tables, filters, search, pagination, forms, and enterprise workflows.
- Testing and quality practices with Playwright, TDD, code review, and CI/CD workflows.
- Technical leadership through RFCs, guild sessions, mentoring, and cross-functional delivery.

CORE SKILLS

React | Next.js | TypeScript | GraphQL | Redux Toolkit | RTK Query | MUI | Formik | Angular | Micro-frontends | Playwright | Keycloak | OAuth2 | RBAC | SAP Commerce | SSR

CERTIFICATION

AWS Certified Developer - Associate

Verify on Credly

EDUCATION

Bachelor's Degree in Computer Science and Engineering

Anna University, Chennai

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Feb 2025 - Present

Flo Energy

Singapore

Delivered customer-facing capabilities across Energy Trading and Risk Management and BusinessPro platforms.

- Implemented Keycloak authentication and RBAC across enterprise workflows.
- Restored reliable Playwright E2E testing in CI after repository migration.
- Authored frontend architecture RFCs and shared testing practices through internal guild sessions.

Senior Software Engineer — Mar 2022 - Feb 2025

HCL Technologies, Client: Julius Baer

Singapore

Modernized enterprise banking workflows by migrating legacy Appway experiences to React.

- Built reusable UI components for tables, filtering, global search, sorting, pagination, and forms.
- Established React, MUI, TypeScript, Redux Toolkit, RTK Query, Formik, and TDD foundations.
- Mentored junior engineers and reviewed code with a focus on maintainability and testability.

Senior Developer — Nov 2020 - Mar 2022

Apar Technologies, Client: DBS Bank

Singapore

Developed reusable Angular widgets and micro-frontend capabilities for banking platforms.

- Designed a reusable widget framework for shared customer-management capabilities.
- Built a configurable drag-and-drop form builder for dynamic business forms.
- Led UI implementation across frontend developers and collaborated with product leads.

Senior Developer — Mar 2020 - Oct 2020

Aspire Digital Technologies

Tamil Nadu, India

Led frontend development for B2B commerce platforms using Angular and SAP Commerce.

- Customized Angular Spartacus storefronts on SAP Commerce Hybris.
- Implemented SSR and State Transfer to improve performance and SEO.
- Worked with design and project teams to deliver business requirements on schedule.

IT Analyst / System Engineer — Aug 2015 - Mar 2020

Tata Consultancy Services

Chennai, India

Built enterprise e-commerce applications for global clients across implementation, releases, and production support.

- Developed responsive, cross-browser compatible web applications.
- Improved frontend performance with asynchronous CMS content rendering.
- Completed a one-year onsite assignment in Australia with client stakeholders and senior management.
